

## **Welcome to the Hanoi University of Science Faculty of Physics Website!**

The Faculty has about 80 faculties who teach and carry out research in the fields of: theoretical and mathematical physics, condensed matter physics, high energy physics, nuclear physics, atomic-molecular and quantum optics, cryogenics, geophysics, radio electronic, applied physics, material science, and computational physics.

Recently, we have about 70 physics, 30 nuclear technology, and 30 material science majors, in undergraduate programs, and 50 students in graduate programs per year. The richness of educational opportunities offered at the Faculty is based upon a long and distinguished tradition of teaching and research.

Hanoi University of Science graduates, along with many scientists who spent their formative years here, have gone on to make significant contributions to science as teachers, researchers, entrepreneurs and intellectual leaders.
